DECADES OF EXPERIENCE IN AVIATION AND AOG EMERGENCIES

The professionals at Axis Global Logistics have deep expertise providing transportation and logistics solutions to the aviation industry and aircraft-on-ground (AOG) emergencies. We're not one piece of the expedited shipment puzzle, we're all of them.

Our 24/7/365 team understands the costs associated with not having your equipment in ready-to-fly condition. We pro-actively provide our aviation clients with optimal solutions to keep their equipment in serviceable condition and we react quickly to unexpected events and deviations from plans with comprehensive resolutions. Through our international network of offices, Axis provides door-to-door service, inclusive of customs clearance, to almost anywhere in the world. Timely communications, updates, and tracking are available throughout the life cycle of shipments via our dedicated operations team and our web-based technology.

A GLOBAL LOGISTICS LEADER

Axis Aviation Services is a division of Axis Global Logistics, a third-party logistics (3PL) provider with a worldwide network of offices and service partners. Founded in 1997 by veteran logistics professionals with decades of experience, the company provides clients across a broad array of industries and business sectors with deep expertise in supply chain management and the highest level of quality assurance. Axis' industry-specific supply chain solutions are built on the knowledge of a powerful leadership team as well as industry-leading web-based technology that provides clients with flexibility and real-time visibility and control throughout the process.

INDUSTRY-LEADING WEB-BASED TECHNOLOGY

Axis has made significant investments in user-friendly world-class hardware and software. Our clients have 24/7/365 web-based access to the status of their shipments, inventory, and projects. We put the highest priority on security; our data center is certified SSAE 16 compliant and meets N+1 redundancy standards.

- Monitor and manage domestic and international air and ground shipments via web-based technology
- Monitor and manage inventory across all domestic and international warehouses via Warehouse Management and LogiView web-based systems
